

# Dairy Exports

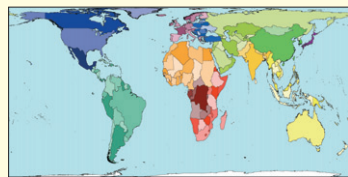

Dairy products include milk, butter, cheese and eggs. Dairy products make up 0.8% of world trade. As with many trade maps, Europe is large and Africa is very small on this map. Their relative sizes result from the combination of the goods moved and the US dollar value of these goods. The value of goods depends partly on exchange rates.

In terms of US dollars worth of dairy products exported (net), New Zealand has the highest per person earnings at US\$ 641 a year. Dairy produce from New Zealand is exported to 140 different territories, 3.5 million dairy cows live there.

Less than a quarter of the world territories have net dairy exports.

Territory size shows the proportion of worldwide net exports of dairy produce (in US\$) that come from there. Net exports are exports minus imports. When imports are larger than exports the territory is not shown.

Land area

## MOST AND LEAST US\$ OF NET DAIRY EXPORTS

Rank	Territory	Value	Rank	Territory	Value
1	New Zealand	641	36	Thailand	0.89
2	Ireland	320	37	Slovenia	0.85
3	Denmark	282	38	Nepal	0.80
4	Netherlands	170	39	Ukraine	0.78
5	Australia	60	40	Cote d'Ivoire	0.72
6	France	38	41	Kyrgyzstan	0.41
7	Belgium	36	42	South Africa	0.35
8	Lithuania	29	43	China	0.29
9	Switzerland	29	44	India	0.08
10	Uruguay	29	45	Bhutan	0.07

annual US\$ worth of net dairy exports per person living in that territory\*

## REGIONAL NET DAIRY EXPORTS

### Technical notes

- Data source: United Nations Conference on Trade and Development, 2002.
- \*There were no net dairy exports recorded for 155 territories.
- Dairy products include milk, cream, butter, cheese, curd, eggs, margarine and shortening.
- See website for further information.

*“With 14-19 head of cattle per person, the Maasai are one of the wealthiest cattle-owning peoples in Africa.”*

Jens Finke, 2003
